PROFILE

Game development student with a strong interest in gameplay programming and AI. I enjoy working on game systems and learning how to build responsive and engaging gameplay. I have experience working in team projects using Unreal Engine and version control.

PROJECTS

Fire Escape @Dispatch

Role: Gameplay programmer

- Worked on gameplay features for an educational game about emergency situations
- Helped translate input from the fire brigade of Kortrijk into game mechanics
- collaborated with a team in a simulated professional work environment

Earn to DAE 3D- Creaweek Game Jam 2025

Role: Gameplay programmer

- Created a small prototype in a small team in 2.5 days
- Implemented a basic mechanic using the s&box engine

TimTim- Group project in Unreal Engine

Role: Gameplay programmer

- Collaborated for the first time on a project from concept to prototype
- Implemented gameplay logic using Unreal Engine
